Textbook

Managerial Accounting: Karen Braun, Wendy Tietz

10 Financial Accounting 2 – 4 weeks (80 Hours)

This course is designed to provide the student with a comprehensive understanding of

accounting topics, both their application and rationale and builds on the basic understanding of financial accounting acquired in the previous financial accounting courses. The course topics focus on the preparation of financial statements and include: current liabilities and contingencies, long-term liabilities, shareholders' equity, retained earnings, statement of cash flows as well as more specialized topics such as earnings per share calculations, accounting for corporate income tax, pensions, leases, accounting changes and error analysis, and the principles of full disclosure in financial reporting. Partnership equity accounting is discussed.

Upon completion of this course, students should be able to:

- Identify the appropriate Canadian GAAP reporting standards--International Financial Reporting Standards (IFRS) and Accounting Standards for Private Enterprises (ASPE), as applicable to individual reporting or presentation situations and/or issues.
- Distinguish non-financial and financial liabilities and apply principals related to the appropriate recognition of non-financial liabilities, including asset retirement obligations under IFRS and ASPE.
- Account for current and other financial liabilities.
- Understand the basic principles of liability recognition and presentation, and recommend appropriate treatment.
- Identify long-term financing sources and other liabilities, and calculate the appropriate measurement and reporting for the issuance, maintenance and pre-mature redemption of debt instruments issued.
- Apply the fair value concept to long-term liabilities using IFRS.
- Identify and appropriately value financial instruments that contain both debt and equity components through appropriate application of IFRS guidance.
- Prepare all journal entries related to long-term liabilities.
- Prepare the shareholders' equity section and related journal entries.
- Calculate basic and diluted earnings per share (EPS).
- Prepare income tax journal entries.
- Calculate pension amounts, and complete a pension worksheet and journal entries.
- Account for changes in accounting policy, estimates, and errors.
- Prepare a statement of cash flows using both direct and indirect methods.
- Apply full disclosure in financial reporting.

11. Human Resource Management -4 weeks

Topics will include strategic importance of human resources management, job analysis and job design, human resource planning, legal requirements, diversity, recruitment, selection, orientation, training, development and career planning, performance appraisal, compensation management, employee benefits, health and safety in the workplace, managing employee relations union-management framework.

Upon completion of the course, students will be able to:

- Contribute to the development, implementation, and evaluation of employee recruitment, selection, and retention plans and processes.
- Administer and contribute to the design and evaluation of the performance management program.
- Develop, implement, and evaluate employee orientation, training, and development programs.
- Facilitate and support effective employee and labour relations in both non-union and union environments.
- Research and support the development and communication of the organization's total compensation plan.
- Collaborate with others, in the development, implementation, and evaluation of organizational and health and safety policies and practices.
- Research and analyze information needs and apply current and emerging information technologies to support the human resources function.
- Develop, implement, and evaluate organizational development strategies aimed at promoting organizational effectiveness.
- Present and evaluate communication messages and processes related to the human resources function of the organization.
- Manage own professional development and provide leadership to others in the achievement of ongoing competence in human resources professional practice.
- Facilitate and communicate the human resources component of the organization's business plan.
- Conduct research, produce reports, and recommend changes in human resources practices.

Textbook

Fundamentals of Human Resource Management: David A. DeCenzo, Stephen P. Robbins.

12. Business Law-4 weeks (80 Hours)

This course covers the legal framework within which business takes place. The student learns how to avoid legal problems. Major topics include: the Canadian legal system, torts, contract law, the Sale of Goods Act, consumer protection, and employment law.

Following topics will be covered in the course:

- a) The present form of the Canadian legal system; precedent; the Canadian Charter of Rights and Freedoms; alternate dispute resolution (ADR).
- b) The law of torts; negligence; defamation; false imprisonment; occupier's liability.
- c) The law of contract: elements; interpretation; discharge; breach remedies, and privacy legislation.
- d) The Sale of Goods Act; consumer protection legislation.
- e) Employment law; human rights.

Learning Outcomes:

Upon successful completion of this course, the student will have reliably demonstrated the ability to:

1. Describe the essential mechanisms of the Canadian system of civil law.
2. Outline how Canadian business is affected by the legal concepts covered within the Course Content.
3. Apply legal theory to determine the legal issues in assigned cases, frequently presenting arguments for both the plaintiff and the defendant, followed by a judgement. This will prepare the student for an approach to legal issues which will arise in later employment.
4. Identify situations where a lawyer is required, and how to deal with a lawyer.

13. Corporate Finance -4 weeks (80 Hours)

Corporate Finance module will cover the topics of Financial Management, Markets and Utilities Valuing Bonds, Valuing Stocks, Risk, Return and Opportunity Cost of Capital, Risk Return and Capital Budgeting, Weighted Average Cost of Capital and Company Valuation, Corporate Financing and Governance, Long Term Financing and Planning, Leasing, Short Term Financial Management.

Upon completion of this course, students will be able to

1. Evaluate investment decisions using capital budgeting techniques.
2. Calculate and interpret the cost of capital of a corporation.
3. Evaluate alternative sources of financing and the impact on capital structure and risk.
4. Determine the value of securities in capital markets and apply statistical measures to measure risk and return of both individual securities as well as a portfolio of securities.
5. Evaluate capital structure decisions.
6. Synthesize the depth and breadth of knowledge, knowledge of methodologies, application of knowledge, and communication skills.

14. Entrepreneurship -4 weeks (80 Hours)

This module covers the purpose of business, starting a business, the legal structure of a business, basic business math, financing alternative and business valuation. There will be a group project in this module on developing a small business plan.

The expected Student Learning Outcomes for the Entrepreneurship course are:

- Students will be able to sell themselves and their ideas. Students master oral and visual presentation skills and establish a foundation of confidence in the skills necessary to cause others to act.
- Students will be able to find problems worth solving. Students advance their skills in customer development, customer validation, competitive analysis, and iteration while utilizing design thinking and process tools to evaluate in real-world problems

and projects.

- Students will be able to mobilize people and resources. Students identify and secure customers, stakeholders, and team members through networks, primary customer research, and competitive and industry analyses in order to prioritize and pursue an initial target market in real-world projects.
- Students will be able to create value. Students are able to create presentations and business plans that articulate and apply financial, operational, organizational, market, and sales knowledge to identify paths to value creation through 1) company formation (for-profit); 2) social innovation (nonprofit); or 3) intellectual property licensing.
- Students will develop and cultivate endurance. Students increase their awareness and deliberately practice the skills and disciplines necessary to increase confidence and agency; foster self-efficacy and self-advocacy; improve communication and problem-solving skills, manage strong impulses and feelings; and identify personal purpose.
