

Curriculum Community Support Worker Diploma

Duration: In-class: 940 Hours (20 hours a week)

Practicum: 120 Hours (30 hours a week)

(Total= 53 weeks)

MS Office Applications - 80 hours

Prepares students to perform functions common to all Microsoft Windows applications. Elements include the ability to create and manipulate Word, Excel, or PowerPoint applications, modify the display of toolbars and other on-screen elements, use online help, and perform file management, editing, formatting and printing functions common to most Windows applications.

Introduction to Human Services - 40 hours

Introduces students to social programs and services, and effective social work practices within well-defined populations.

Lifespan Development - 80 hours

Presents a comprehensive overview of the developmental changes of children and adolescents. This course also provides an in-depth study of social, cultural and environmental issues that affect the development of the children and adolescents.

Children and Youth at Risk - 80 hours

Provides the skills and knowledge needed to assist children and youth dealing with special concerns. The focus is on acquiring a basic understanding of at-risk issues and potential treatment strategies, including intervention with children with specific social challenges.

Understanding Addictions - 40 hours

Familiarizes students with substance abuse and counselling. The course will focus on treatment setting and planning, as well as the continuum of care provided.

Indigenous Studies - 40 hours

The Indigenous Studies module provides students with opportunities to develop knowledge, skills, awareness and values needed to work with Indigenous individuals and families in schools and communities. Students will be trained to support the development of healthy Indigenous individuals, families and communities. Graduates would be able to function interdependently as members of a support team under the direction and supervision of experienced professionals in health, education and/or human service settings.

Understanding Cultural and Social Differences - 40 hours

Introduces students to the world views of diverse groups of people in Canada and the multicultural counselling competencies, including alternative holistic approaches, needed for working with these diverse groups.

Rehabilitation and Care Planning - 80 hours

Reviews development through the lifespan from prenatal to elderhood. Students examine physical, intellectual, social, and emotional growth in each stage, emphasizing that development results from the interdependence of these areas at every stage.

Introduction to Pharmacology – 40 hours

Covers basic pharmacology of mental health problems and substance use. Effects of psychiatric medications and substance use on the brain will be covered.

Introduction to Mental Health - 80 hours

Explores the different kinds of mental health issues and how to support individuals living with mental health issues.

Sociology and Family Systems Theory - 80 hours

Familiarizes students with the systems theory of counselling (family therapy). The course will focus on theory of family counselling, as opposed to individual counselling, and some of the major models involved.

Communication Skills for Counselling, Recording and Reporting - 40 hours

Develops students' knowledge, skills and attitudes for effective communication for counselling from both a personal and interpersonal perspective.

Counselling Theories - 40 hours

Provides a general overview of the counselling theories/therapies upon which psychology is based, as well as how they are utilized in various counselling situations. These counselling theories will be explored from historical, modern and multicultural perspectives.

Group Counselling- 40 hours

Introduces students to some of the strategies and skills used to lead or participate in groups effectively in counselling situations. Group facilitation and Client Interviewing Techniques are covered.

Gerontology and End of Life Care - 40 hours

Introduces students to developmental theories in aging to help them understand the psychosocial applications to growing old in our society. Students are also introduced to the strategies necessary to provide emotional and physical support to the dying person and their family.

Self-Care and Mentoring of Life-skills - 80 hours

Explores self-care strategies used to reduce stress and promote personal and professional wellness. Provides students the skills to assist clients to be as independent as possible by supporting them with the instrumental activities of daily living.
